Washington 25, D. C.

FIELD MEMORANDUM NO. 1122

Re: Sales of Surplus
Perishable Products

TO ALL RANKING FIELD OFFICERS:

July 22, 1947

Regulation 4422 of the Department of Agriculture regulations as revised June 11, 1947, no longer contains the details of instructions on sales of surplus perishable products. A new regulation "4423" now contains instructions on this subject. The only important change was to eliminate the requirement that a comprehensive report relative to the sale of the surplus products be submitted to the Chief of Bureau at least once each year. Therefore, you may discontinue the annual report prescribed in the memorandum of February 11, 1942, issued jointly by Messrs. F. J. Hopkins and M. L. Nichols.

Detailed records of products disposed of and of sales receipts shall continue to be maintained and be available for examination when required. This is necessary to assure proper accountability for both Federal and cooperator-owned property and funds which are handled by Federal employees.

W. H. Bennett

Chief
